EDUCATION

BSC CS
R. J. College (Autonomous)
2021-2023
Currently, I am pursuing my education as a Computer Science student at Ramniranjan Jhunjhunwala College in Ghatkopar. I am enrolled in the year 2021 and am excited about the opportunities and knowledge that this program will provide me. The college has a robust curriculum that covers various aspects of computer science, including programming languages, software development, database management, and more. I am confident that the education I receive at R. J. College will help me achieve my career goals.

PROFILE

Hi there! My name is Aakash Chaurasiya, and I'm a Full Stack Developer based in Mumbai. I started my journey as a Computer Science student in 2021 - 2023, where I gained extensive experience and knowledge in the field of software development.

As a Full Stack Developer, I possess a strong understanding of both front-end and back-end technologies. I have hands-on experience in creating fully-functional web applications and user-friendly interfaces using programming languages such as JavaScript, HTML, and CSS, as well as frameworks like Node.js, Express.js and React.

Throughout my career, I've been praised for my ability to work collaboratively with other developers and stakeholders. I am able to communicate effectively with clients to identify their needs and requirements, which ultimately results in successful project outcomes and satisfied clients. I'm confident that my skills and expertise make me an excellent candidate for any Full Stack Developer position, and I look forward to discussing any opportunities further.

WORK EXPERIENCE

2021-2023

Fresher

- As a Full Stack Developer, I have been able to create several exciting applications using advanced technologies. I've worked on a blog application, which features a backend built with Node.js and Express, and a MongoDB database. The application also includes user authentication, which ensures that only authorized users can create, edit and delete blog posts.
- Additionally, I've also built a movie application that allows users to browse and search for their favorite movies. The application was built using React and Redux and includes a feature that enables users to rate and review movies.
- Another project I worked on is a to-do application, which helps users stay organized and focused. The application includes a user-friendly interface and allows users to add, edit and delete tasks, set reminders, and create categories.
- Lastly, I've built an online music player that allows users to stream and listen to their favorite music. The application was built using advanced technologies such as React, Node.js, and concept like context api, and includes features such as a search function, playlist creation, and social media integration.
- I look forward to continuing to grow as a Full Stack Developer and contributing to exciting new projects in the future.
